#### ALL-SEASON "BLOCK" TREAD DESIGN

Squared-off tread elements form an effective gripping edge for excellent year-round traction. This modern-looking radial will perform well in wet and dry weather.

#### DEEP LATERAL SHOULDER SLOTS

This design uses lateral slots in the shoulder to help ensure excellent traction throughout the life of the tire.

#### "SEE THROUGH" GROOVES

Circumferential "see through" grooves help disperse water and slush to provide dependable all-season traction.

#### VARIABLE PITCHED TREAD ELEMENTS

Computer-designed to reduce noise, the different sized elements work to provide a quiet-running tire at highway speeds.

#### DUAL COMPOUND TREAD

A high-mileage tread cap compound is supported by a highly resilient base compound. Working in tandem, this cap-base system promotes excellent durability and low rolling resistance.

#### POLYESTER CORD BODY

Dimensionally stable polyester cord improves tire uniformity by providing a more consistent carcass. The end result is a more dependable, durable radial for value-conscious motorists.

#### RADIAL CONSTRUCTION

Radial construction provides performance advantages: excellent ride, responsive handling, long mileage and fuel economy.

#### BLACK AND WHITE SIDEWALLS

Available in scuff-resistant white sidewall in selected sizes.
